MOHAMMAD MOSAYEBI

Data Analyst | Sales & Marketing Analytics | Machine Learning

Tehran, Iran • moham.ax1245@gmail.com • +98 935 172 3204 • linkedin.com/in/mohammad-mosayebi-977243264 • github.com/MMosayebi

Date of Birth: 13 July 2003

PROFESSIONAL SUMMARY

Data-driven analyst with 3+ years of experience transforming sales, marketing, and customer data into clear, actionable insights for cross-functional teams. Proven track record of building reporting systems and interactive dashboards using Python, Power BI, and SQL Server, paired with hands-on machine learning experience in classification, clustering, and churn prediction. Combines strong business communication skills with a growing focus on data science and predictive analytics to support faster, smarter decision-making.

TECHNICAL SKILLS

- Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Exploratory Data Analysis (EDA), Jupyter Notebook
- Business Intelligence & Reporting: Microsoft Power BI, Looker Studio, Microsoft Excel, Executive Dashboarding, Microsoft PowerPoint
- Databases: SQL Server / Transact-SQL (Query Writing, Data Extraction, Reporting)
- Machine Learning: Sales Forecasting, Customer Segmentation, Churn Prediction, Classification & Clustering Models
- Core Domains: Sales & Marketing Data Analysis, Customer Behavior Analysis, Data-Driven Decision Support

PROFESSIONAL EXPERIENCE

Senior Data Analyst — August 2023 – Present

Tarh-Ideh BTL Agency, Tehran, Iran

- Supported BTL campaign planning for major FMCG clients — including Kalleh, Unilever, and Active — by analyzing sales and performance datasets to uncover trends that shaped campaign targeting and budget allocation.
- Designed and maintained interactive Power BI dashboards to track team and project KPIs in real time, reducing manual reporting effort and improving stakeholder visibility into campaign performance.
- Collaborated cross-functionally with sales, marketing, and creative teams to gather, validate, and analyze market and customer data, aligning campaign strategy with data-driven insights.
- Conducted SEO performance analysis using Power BI and Looker Studio, translating website traffic and engagement data into recommendations for digital marketing optimization.
- Identified process inefficiencies through statistical analysis and proposed data-driven solutions that streamlined reporting workflows and improved turnaround time for stakeholder deliverables.

Business Intelligence Intern — December 2022

Dadeh Pardazan Ertebat Gostar Viuna, Tehran, Iran

- Built foundational knowledge of business intelligence concepts and end-to-end data analysis workflows.
- Created BI reports and interactive dashboards in Power BI to support internal reporting needs.
- Wrote and optimized SQL Server queries to extract and structure data for analysis.

PROJECTS

All projects below are available in a single repository: github.com/MMosayebi/Projects

Customer Segmentation for Targeted Marketing

- Applied unsupervised clustering techniques to segment customers by behavior, enabling more targeted marketing strategies and campaign planning.

Customer Purchase History Analysis

- A Python-based data analysis project focused on understanding sales performance, customer behavior, product performance, and purchasing patterns.

House Price Prediction

- House price prediction using Python, data preprocessing, exploratory data analysis, and regression models with Scikit-learn and PyCaret.

EDUCATION

Bachelor of Computer Science

September 2021 – January 2026

Payam Noor University, Tehran, Iran

Master of Science in Systems Theory

Expected September 2026

Islamic Azad University, Tehran, Iran

CERTIFICATES

- Machine Learning with Python — Maktabkhooneh (May 2026)
- Ultimate Beginner's Guide to Power BI — Enterprise DNA (March 2023)

LANGUAGES

English — Professional Working Proficiency
